400+ professionals attend every year.

Do you want your clients to heal faster and deeper with less stress?

We'll help you learn mind-body methods that can rapidly heal trauma, reduce anxiety, enhance performance and more. We've trained over 16,000 professionals just like you.

"Clients are delighted with the results of energy psychology. They see that they can actually change things within themselves instead of just dissecting them, which is so common in conventional approaches. They may have been able to cope better as a result of conventional methods, but they didn't experience the deep, transformational change that comes from energy psychology work. They often feel a profound sense of wholeness and well being they have never felt before." - Heather LaChance, PhD, DCEP

The #1 reaction to attending for the first time is,
"I'm home. I've found my community."

Building a Culture of Love & Compassion in a Divided World

Days before his death at Sandy Hook, Scarlett’s son wrote this message on their chalkboard: “Nurturing Healing Love.” Realizing this was a path forward, she decided to provide solutions that address the root cause of the suffering that leads to despair. Dive into the Choose Love Mindset and discover the neuroscience of overcoming fear.

Scarlett Lewis founded the Jesse Lewis Choose Love Movement after losing her six-year-old son in the Sandy Hook tragedy. She, along with experts, developed the Choose Love Movement, a comprehensive social-emotional development program offered free to schools, homes, and communities worldwide.

Energy psychology blew me away

“I was trained at some of the best schools and yet wasn’t able to get far with some people, particularly those with trauma and addictions. And then I started using energy psychology. I made more progress with patients in a session or two than I had in several years of treating them. It blew me away.” – Anthony Tranguch, MD, PhD

A Glimpse into the Future of Frequency Medicine

A new medical model is emerging, heralded by photobiomodulation—frequency medicine in the domain of light. Get a glimpse into the future of frequency medicine, in which John believes light and sound will reign supreme.

John Stuart Reid is an acoustic physics researcher. He has studied the physics of sound for four decades and is a respected authority in the field of cymatics. He invented the CymaScope instrument, a new type of device that makes sound visible.

Dream Transfer: A Powerful Mode of Imaginal Healing

We can bring a dream to someone who needs a dream—a healing image, a vision of life possibility. Robert guides us on a conscious dream journey to a place in the imaginal realm where we can find a dream that we—and those we are called to help—may need today.

Beyond Energy: The Power of Stacked Clinical Skills in Energy Psychology

Most discussion of energy psychology (EP) has focused on the “energy” part of the term. While valuable, this has hindered EP's integration into mainstream therapy. Most EP approaches “stack” multiple therapeutic skills, but they are rarely articulated. Leave with a skills map, making it easier for you to communicate with others.

Robert Schwarz, PsyD, DCEP, ACAP-EFT, has been a licensed psychologist for 35+ years. He was ACEP's executive director of ACEP for 17 years. Bob has organized over 30 conferences and ACEP's online programs. Author of 3 books, including: *Tools for Transforming Trauma*, Bob has taught internationally.
